

ALL CHANGE.....

Dear Patients, as we are closer than ever to being able to action our plans to refurbish & remodel the surgery building, I thought that I would share these with you ! We have been working on these for three years now, hampered by the demise of the Primary Care Trust and ongoing changes in responsibility for GP surgery premises, which now rests with NHS England. Whilst we negotiate the final elements in order to achieve that elusive 'green light', let me outline what these plans will achieve in our quest to improve and enhance patient services here at the surgery, and also offset the daily increase in our patient numbers where we expect to have 13,000 patients on our list next month:

- An increase in clinical space of 40%, including 5 additional GP consulting rooms and an extra Nurse treatment room
- A patient lift to the first floor and secondary waiting area
- A complete refurbishment of the building
- A remodelling of the Main Entrance, Waiting Room & Reception, giving improved access and privacy where needed
- A significant increase in the of number parking spaces
- Additional consulting space enabling us to invite additional patient services to operate from the building, such as physiotherapy, ENT & hearing, Well Being and Chiroprody/Podiatry etc.
